Ricky Nayar
CEO at Atlas Granite

With hundreds of exotic slabs and thousands of man hours this was a very high end intricate job. We are pleased that not only we met tight delivery schedule but supplied & installed high end custom products as per specifications. Our workmanship is visible in Oiler's dressing room, Hockey Ops, Hundreds of Semi circle loge tables, Quartz drink rail encompassing interior of Arena, Marble tops/drink rails in all suites, Custom marble tops in baths, Restaurant counters.

Commercial/Multifamily jobs are very different from regular jobs as every trade is dependent upon another and non performance by even one trade can affect timeline of the project. At Atlas we are proud to say that

we have completed numerous big projects through out Western Canada & have a system in place for time sensitive projects.

Even though we source raw material from through out the world, we are a strong supporter of Canadian manufacturing. All of our products are fabricated in our fully automated plant in Edmonton which helps us keep quality and delivery schedule under control. Also we are able to meet/beat pricing from Asian competition at any given time.
